

VAHID VAKILI-ZARE

Web Full-Stack Engineer

ABOUT

I always enjoy programming and I have been +9 years' experience in this field professionally. I am an expert in Python and TypeScript and very interested in working with a motivated and creative team. I have always tried my best to do my job accurately and by the standard. It is worth mentioning that commitment and work ethic are the main priorities in my job. Linux Manjaro and Open Communities are my top favorites.

EXPERIENCE

RahkarSanat | راهکار صنعت
Technical Consultant (Part Time)
December 2022 – Present (Remote)

I still learn with a creative and kind team in the field of IOT and Fleet Management...

Skills: TypeScript, MongoDB, NestJS, Redis, GraphQL, Mqtt, SocketIO, gRPC, ...

AriaCo | آریاکو
Full-Stack Engineer
April 2022 – March 2023

Working in the field of financial technologies as a web full-stack engineer and software designer was an opportunity given to me by AriaCo company. During this time, I gained a lot of experience in the implementation of financial platforms as well as the execution of financial transactions and contradictions in the context of NoSQL technologies.

The big challenge I had in designing this platform was the number of client applications that should have the ability to accept each other while having an isolated environment in a common database, and also the architecture should be such that each client can express their own ideas.

Skills: TypeScript, MongoDB, NestJS, Redis, PWA, Mqtt, Scrum, Jest, K6, ...

Voluntary Work
Career Break
February 2022 – March 2022

I was developed a portal to track and manage devices received by the maintenance department of the law enforcement command of Kerman province.

Ayandeh-Pajooohan | آینده پژوهان پیشرو دانش و فناوری سلامت
Back-End Developer
November 2020 – January 2022

As of my best experience as a back-end engineer in cooperation with a software company is Ayandeh Pajooohan Company in health technology, which had a very open vision in the field of open-source development and provided solutions with scientific support that encourage me to develop a BPMN engine.

30TEB is a home care service application developed using PWA by VueJS and NestJS with NoSQL technologies, also provides service to the patient and attendant at their own location within the city using OverpassAPI and also provides the possibility of audio and video chat using WebSocket and WebRTC for communication between patients and doctors.

Among the challenges faced in this project was the use of Push Notification on the web platform in browsers specific for each user, which we achieved this difficulty by using the IndexedDB.

Skills: NestJS, Redis, WebRTC, OpenAPI, GraphQL, Jest, SocketIO, PWA, SSR/CSR, ...

Yekta-Ertebat | یکتا ارتباط تعاملی پرتونما

Full Stack Developer

August 2019 – October 2020

Working with Yekta Ertebat was one of my most exciting collaborations with a growing and developing company. In this company, I had a great experience in team collaboration as a full-stack engineer.

Among the tasks that I was engaged in at Yekta Ertebat Company was the design and development of a store builder and an integrated customer club. In addition, for some time I was engaged with scraping data using tools such as Appium and Selenium.

In the Kasbify project, using artificial intelligence as a customer behavior predictor to buy from a store or order from it was a challenge that we overcame by using a customized Q-learning reinforcement learning algorithm.

Skills: Agile, SCRUM, Trello, Kanban, Jira, Selenium, Vue2/3, MongoDB, ExpressJS, ...

Houshvar-e-Aria | هوش مصنوعی هوشور آریا

Founder & CEO

July 2018 – September 2019

One of the most valuable experiences I've had is trying to build a new company and plan for growth and success with a small team, I found my talent and passion during this golden age.

Professional Development

Career Break

September 2015 – August 2018

During this period, when I was a master's student in Computer Science in the field of Intelligent Systems, in this course I developed my professional experience with Python and used it in Machine Learning and Artificial Intelligence.

My focus at this time was on Metaheuristic Optimization and Deep Representation Learning with small data and some algorithms like SVM and KNN.

Specialist Recruitment Referee (Fanavard)

Contract

Kerman, October 2017

Tavan-Moj-e-Karmania | توان موج کارمانیا
Full Stack Developer
September 2013 – August 2015

During the period of cooperation with Tavan Moj Karmania company, I worked as a software designer and full-stack developer using PHP language and Laravel framework along with MySQL database and dashboard designed with Bootstrap and AngularJS.

Among the challenges, I was dealing with at this time was the real-time display of information resulting from location data registration using RFID. To overcome this problem, a set of required statistics is stored in the database for each data registration request, such as counting and totaling in discrete time blocks to show in the dashboard.

Skills: MySQL, PHP, Laravel, Bootstrap, AngularJS, RFID, ...

RESEARCH

Parallel computing and massive data processing with real-time streaming approach and its application in natural language processing, Vali-e-Asr University Of Rafsanjan (August 2016).

Local fleet management system, Vali-e-Asr University Of Rafsanjan (September 2016).

Investigation of neurons simulators and comparison criteria, Vali-e-Asr University Of Rafsanjan (September 2015).

PROJECT

Workflow engine based on BPMNs

Feb 2023 – Present

WorkflowJS is a lightweight and flexible library for building workflows and processes with NodeJS. It allows you to define processes using BPMN 2.0.

Open Source Published

<https://www.npmjs.com/package/@vhidvz/wfjs>

Terabar | ترابار

Dec 2022 – Present

Terabar is a logistics marketplace, that helps small, medium, and large businesses to easily send their customers' orders and have an accurate estimate of the cost of postage and incur the lowest postage costs.

<https://terabar.ir>

Naming Conventions Modeler

Nov 2022 - Present

Simple and Fast naming conventions modeler implemented by Proxy, zero dependencies.

Open Source Published

<https://www.npmjs.com/package/naming-conventions-modeler>

Attribute Based Access Control Library

May 2022 - Present

Open Source Published

<https://www.npmjs.com/package/abac/>

Wide | واید

Apr 2022 - Mar 2023

Contactless mobile payment (wireless)

The wide platform has made it possible to remove the bank card and card reader. This application is installed on Android and iPhone smartphones and tablets and provides the ability to pay and receive money easily for the seller, customer, and everyone.

FAVA Maintenance Portal | پورتال تعمیر و نگهداری فلاوا

Feb 2022 - Mar 2022

This is a self-hosted portal to modernize the maintenance process of the VP of FAVA, Kerman, Kerman province, Iran.

30teb | سی طب

Nov 2020 - Jan 2022

Tolo Behbodhi Assistive System is a practical platform for provision, provision, and access to health care services at home, which is abbreviated as 30TEB.

<https://landing.30teb.app/>

Kasbify | کسبیفای

Aug 2019 - Oct 2020

We have provided a system that will meet your needs in any industry, of any size and market. With us, you will have a complete understanding of online and offline sales processes, warehousing, distribution, product supply, customer orientation, or any other related issue. Because the ultimate goal of us and you is to increase the amount of sales and improve the customer return rate.

The main tool in this way is to collect accurate and detailed data from buyers in every sales platform. These aggregated data are used to ensure that customer-oriented strategies are designed and implemented with greater accuracy and by accurately measuring real-time statistics, it leads to the creation of the best customer-specific shopping experience.

<https://kasbify.com/>

Saman RFID | سمن

Sep 2013 - Aug 2015

This is a self-hosted solution for the Midok copper mine located 42 km northeast of Babak city, Kerman province, providing inbound tracking with RFID on trucks and online reporting to engineers there to help predict mine output.

PUBLICATION

V. Vakili, H. Rezaei, K. Rezaei, K-Nearest Neighbors Using Small Data and Deep Neural Networks, 3rd International Conference on Soft Computing, Guilan, Iran (2019).

CERTIFICATE & WORKSHOP

Network+ Certificate (April 8, 2014).

Workshop on modern translation methods, Rafsanjan, Iran (March 6, 2013).

TEACHING

Assistant

Faculty of Information Technology, University of Sistan and Baluchestan, Zahedan, Iran (September 2016 – February 2017).

Assistant

Faculty of Computer Engineering, Vali-e-Asr University Of Rafsanjan, Kerman, Iran (September 2013 – September 2015).

EDUCATION

University of Sistan and Baluchestan

September 2016 - September 2018

Master of computer science in the field of Intelligent systems.

Thesis: K-Nearest Neighbors and Support Vector Machine Classification using Deep Neural Network Representation.

Vali-e-Asr University Of Rafsanjan

September 2012 - September 2015

Talented Undergraduate Student in the field of information technology engineering at the Vali-e-Asr University of Rafsanjan.
